

FOR IMMEDIATE RELEASE

ReVolt Control Named a Money-Saving Product by BUILDINGS Magazine

Easy installation of modular system saves owners and builders money, time and energy

TEMPE, Ariz., June 12, 2017 – Communications Integrators, Inc. (Cii), a leader in designing and manufacturing modular power, voice and data solutions, is proud to announce that *BUILDINGS* has selected its ReVolt Control, a modular plug and play lighting and control system, as a [2017 Money-Saving Product winner](#) in the Energy Saver category. ReVolt Control is a member of an elite group of 41 products showcased in the June 2017 issue of *BUILDINGS* and online at www.BUILDINGS.com.

Finalists were evaluated by the *BUILDINGS* editorial staff for the money-saving qualities they offer to building owners and facility managers in areas such as energy efficiency, water savings, and maintenance.

“We are honored to be recognized as a money-saving product from *BUILDINGS* magazine,” said Jon Dumbauld, president of Cii. “With ReVolt Control, we’ve delivered to market a lighting and plug-load control system that combines energy savings with labor and material cost savings—attributes valued by every facility and building manager.”

ReVolt optimizes building lighting and power usage, reducing on-site labor by up to 75% and energy consumption by up to 25%. ReVolt comes pre-configured and pre-provisioned; and its modularity allows you to simply snap it together. It can be reconfigured and hot swapped live, making tenant improvements (TI) fast and painless.

The plug and play nature of ReVolt takes your space beyond LEED: its reusable infrastructure cuts your raw material usage by an order of magnitude every time you re-shape your space.
