WARRANTY

5 Years

Cii SlotLink™ is the modular answer to providing multiple power circuits to gaming machines in the casino. SlotLink™ allows for new equipment to be added quickly and simply. As simple as unplugging a lamp, users can disconnect and move an entire cluster of machines with minimal disruption to the gaming floor.

FLEXIBILITY - As Mobile as You Need

With Cii Plug & Play units, installing and reconfiguring gaming layouts is fast, easy and cost-effective.

CAPACITY - Providing More Power Options

Multiple outlet units allow high capacity multi-circuit wiring configurations to be added for future equipment needs.

CUSTOMIZATION - Your First Stop in Customer Service

SlotLink™ can be customized to provide any power, voice or data service to any type of equipment.

BETTER MANAGEMENT - Decrease Monetary Waste

Up to 4 dedicated circuits and custom duplex colors and labels help you manage critical power requirements, ensuring only critical systems reside on expensive UPS grids, reducing the number of needed back-up generators.

LIFE CYCLE COSTS - Extend the Life of Your Gaming Floor

SlotLink™ allows for addition to flooring layout as often as needed, without reinvesting in a new power system.

SAFETY - Protecting You and Your Investment

Cii power connectors have a "first make- last break" grounding and are keyed to ensure proper connection.

WARRANTY

Cii guarantees product shall be new and free from defect in material and workmanship for a period of 5 years from the date of shipment.
